PROJECTS

Watch Branding Project |Link

- o I built a Responsive Web Design for Branding Watch.
- o I used HTML,CSS and Boostrap to build the front end and also incorporated responsive web design to ensure it looks great on all devices. Successfully showcased the brand's identity and product features, allgning with the target audience's preferences.
- o Executed a comprehensive user experience overhaul by conducting 30+ user testing sessions; insights gathered enhanced the platform's usability and contributed to an increase in customer retention rates by 18% in six months.
- o Watch Branding Web design using HTML, CSS and Boostrap. Focused on enhancing user experience through intuitive navigation, modern UI/UX principles and cross-browser compatibility.

Email Validation Project |Link

- o An Email Validation project is a great way to showcase of my skills in front-end development and implement real-world functionality.
- o Developed an email validation tool with JavaScript, providing instant feedback and improving form submission accuracy by 30%. Optimized application performance, reducing load times by 20% and improving SEO rankings.
- o Collaborated in a Git-based environment to streamline version control and team workflows. Ensured web accessibility compliance (WCAG) to support a diverse user base, increasing user engagement by 15%.

WORK EXPERIENCE

Front-end Intern(Virtual)

Besant Technologies|Septemper 2024- Present

- I am currently pursuing Front-end development training at Besant Technologies, focusing on enhancing my skills in HTML,CSS,JavaScript and modern frameworks like React and Angular.
- My training includes mastering responsive Web Design, utilized UI/UX principles for enhanced usability while incorporating CRUD operations ensuring seamless data interactions across platforms..
- Achieved hands-on experience creating five fully responsive web applications during training.
